## **DETAILED ACTION**

Page 2

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-28, drawn to a substrate processing apparatus.

Group II, claim(s) 29-32, drawn to a substrate processing method.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature shared between the groups is the apparatus limitations shared between both groups.

Such a resist coating apparatus is found in Yoshioka (US 6168667, as supplied by applicant) (Figure 1). Yoshioka teaches 1<sup>st</sup>-3<sup>rd</sup> transfer means (robotic arms) **21-23**, transfer means **21** is rotated to form a 1<sup>st</sup> delivery stage (col 5, lines 5-10) and a 2<sup>nd</sup> delivery stage **33a.** It also teaches using a processing block comprising: a resist coating unit **34a**, a development unit **34b** and PREBAKE and POBAKE heating units **33** (col 5, lines 35-40). Yoshioka discloses the claimed common technical feature except for the existence of multiple processing blocks in the apparatus.

JP10-144765 (as supplied by applicant) is also directed towards robotic substrate processing systems and teaches that it is desirable to connect multiple substrate processing blocks (such as multiple coating/developing blocks of Yoshioka) together in an apparatus in order to reduce transfer times for the substrate and reduce the quantity of foreign material on the substrate.

Thus it would have been obvious to a person of ordinary skill in the art at the time of invention to combine the multiple processing blocks in the apparatus in order to reduce processing times and to reduce foreign material on the substrates.

Additionally, it would have been an obvious matter of design choice to have multiple processing blocks, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Since the technical features common to the different inventions are known to the art, they are not a contribution which each of the claimed inventions, considered as a whole, makes over the prior art and are not special technical features.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Page 4

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOEL G. HORNING whose telephone number is (571) 270-5357. The examiner can normally be reached on M-F 9-5pm with alternating Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael B. Cleveland can be reached on (571)272-1418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
